Keywords: R, applications, business, government, non-profit

In more than 6 years of writing for the *Revolutions* blog [1], I've discovered hundreds of applications of *R* in business, in government, and in the non-profit sector. Sometimes the use of *R* is obvious, and sometimes it takes a little bit of detective work to learn how *R* is operating behind the scenes. In this talk, I'll recount some of my favourite real-world applications of *R*, and show how *R* is behind some amazing and often surprising innovations in data-driven organizations.
